ASTRONOMICAL SPECTROSCOPY

Suzana Galović
Stefan Cikota

ELF/VLF OBSERVATIONS OF IONOSPHERE

Vasilije Perović
Marta Nikić

Do join if you:

- want to learn to program
 - It's very frustrating though
 - You do most of it with a pen and paper!
 - will convert you to a religious zealot that argues about spaces vs tabs, or Emacs vs Vim vs IDEs etc.
- You don't mind that there's no clearly defined science goal like other groups have
 - Your presentations might get booring
- Don't mind learning math
- Aren't afraid of experimenting!

Don't join if you:

- You dream of having cool looking presentations
- Hate math
- Don't have patience
- You don't want to learn how to program
- Hate cookies, candy and sweets

COMPUTER VISION

Dino Bektešević
Filip Matković
